IACHEC 2010

Summary of the Isolated Neutron Star and White Dwarf Working Groups

Vadim Burwitz for both WGs

International Astronomical Consortium
for High Energy Calibration
Apr. 11-15 2010, Woodshole, USA

Home work from IACHEC 2009

- Discuss possible Chandra LETGS improvements with Chandra calibration Group
 - influence of new HRMA effective areas ...
- Analyse LETGS data on
 - Sirius B (50ks on-axis and 50ks off-axis observations)
- GD153 110ks observation in the queue
 - Prepare grid of models (Lar)
 - analyse data as soon as available
- Provide WD spectra in xspec format on web
- Improve link to iNS RXJ185

**GD153 110ks LETGS
Observation just performed**

**Data will be analysed and
Paper prepared before
IACHEC 2011**
