

Chandra Calibration Status

IACHEC Meeting April 11, 2011

Recent Calibration Products or Software Releases

ACIS

- ACIS temperature-dependent gain correction software for timed-event (TE) mode data was released in CIAO 4.3 on Dec. 15, 2010.
- ACIS cti-correction software for TE mode data in graded (G) telemetry was released in CIAO 4.3
- A new contamination model for the ACIS-I was released in CALDB 4.4.1 on Dec. 15, 2010.

HRC

- An update to the HRC-I QE to improve cross-calibration between HRC-I/HRC-S/ACIS-S was released in CALDB 4.4.1
- A time-dependent HRC-S QE will be released in the next CALDB

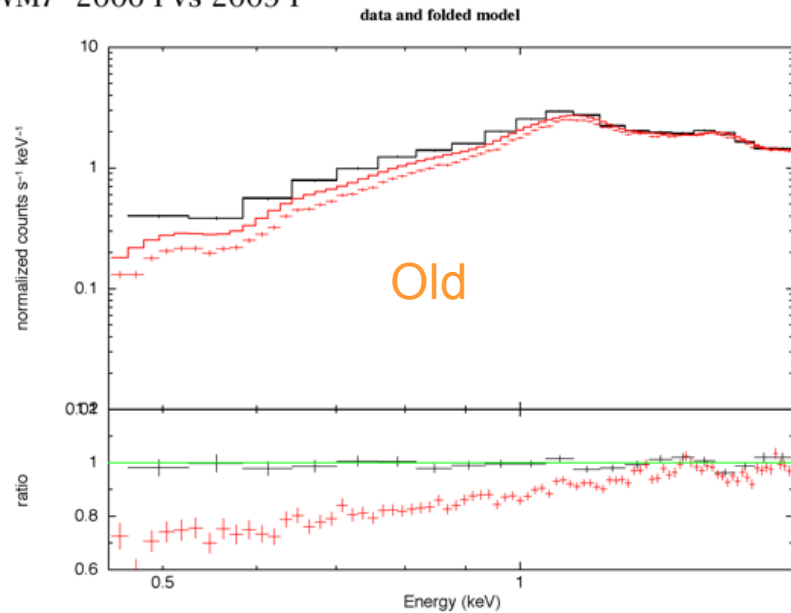

Recent Calibration Products or Software Releases

LETG

- Updated extraction regions and the clocking angle for dispersed LETG/ACIS-S spectra were released in CALDB 4.1.1
- Revised LETG transmission efficiencies for the higher orders ($|m| > 1$) will be released in the next CALDB

Update to the ACIS-I contamination model

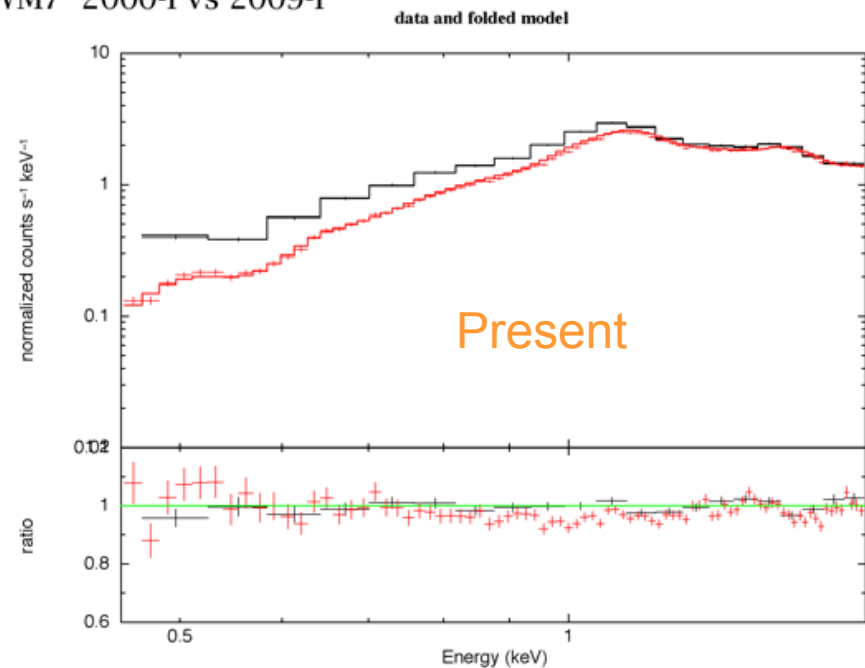

AWM7 2000-I vs 2009-I

alexey 4-Oct-2010

Comparison of two ACIS-I observations of AWM7 taken 9 years apart fit with the old and present versions of the ACIS-I contamination model.

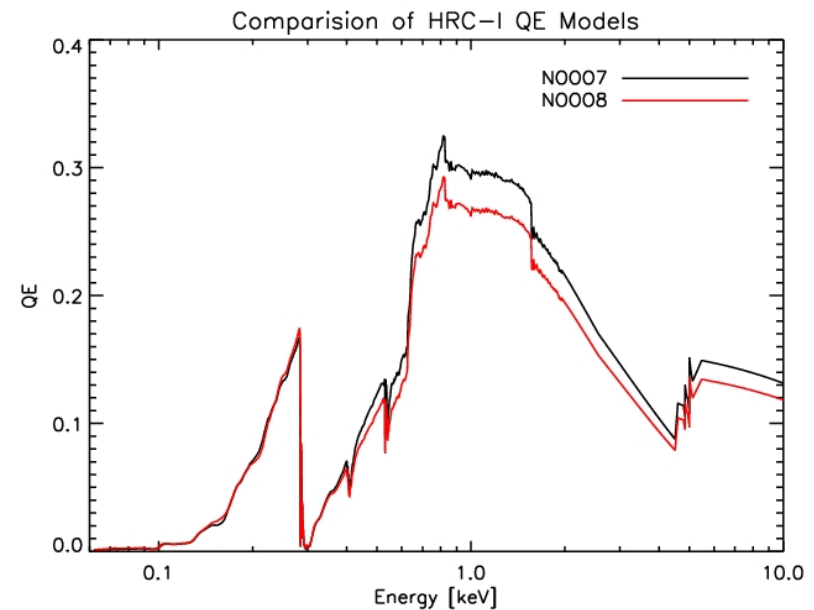

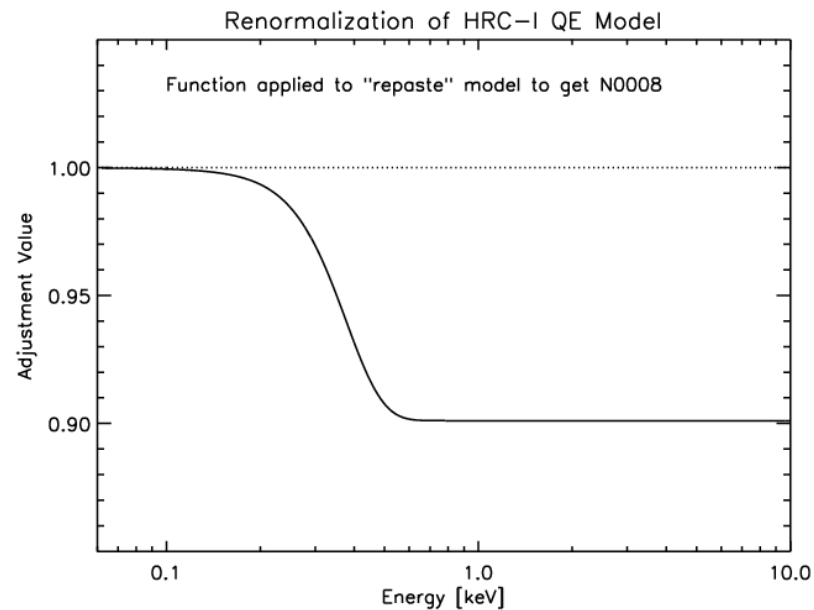

AWM7 2000-I vs 2009-I

alexey 4-Oct-2010 18:09

Updates to the HRC-I Effective Area

The HRC-I QE was recently updated to improve the cross-calibration between the HRC-I and other Chandra detectors.

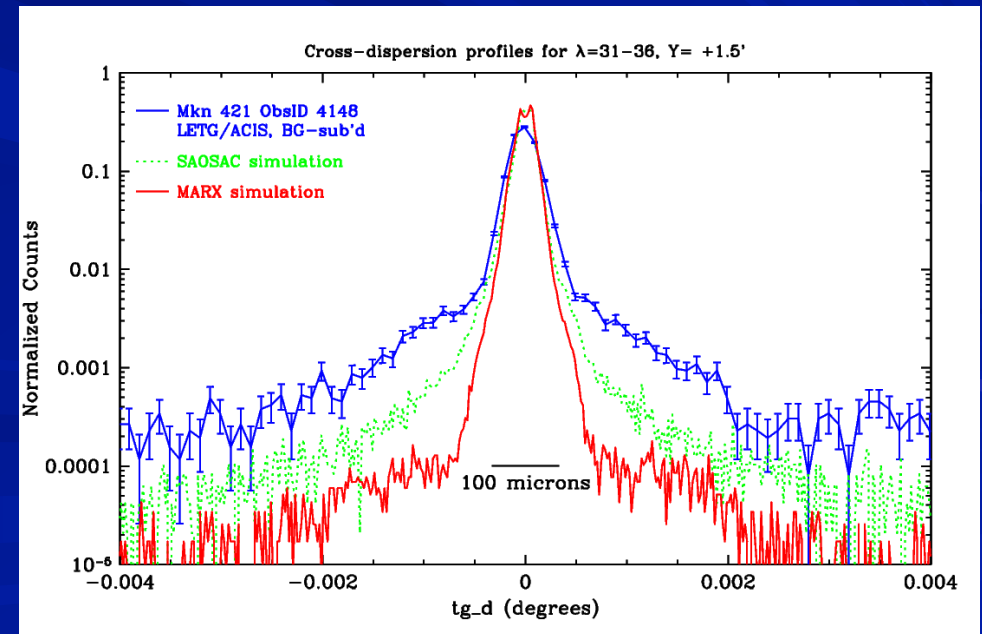

Target	Obs. Rate	Pred. N0007	%diff	Pred. N0008	%diff
HZ43	3.88	3.46	8.7	3.91	0.9
PKS2155	1.54	1.64	6.5	1.53	0.6
G21.5-09	0.541	0.601	11	0.541	0.0

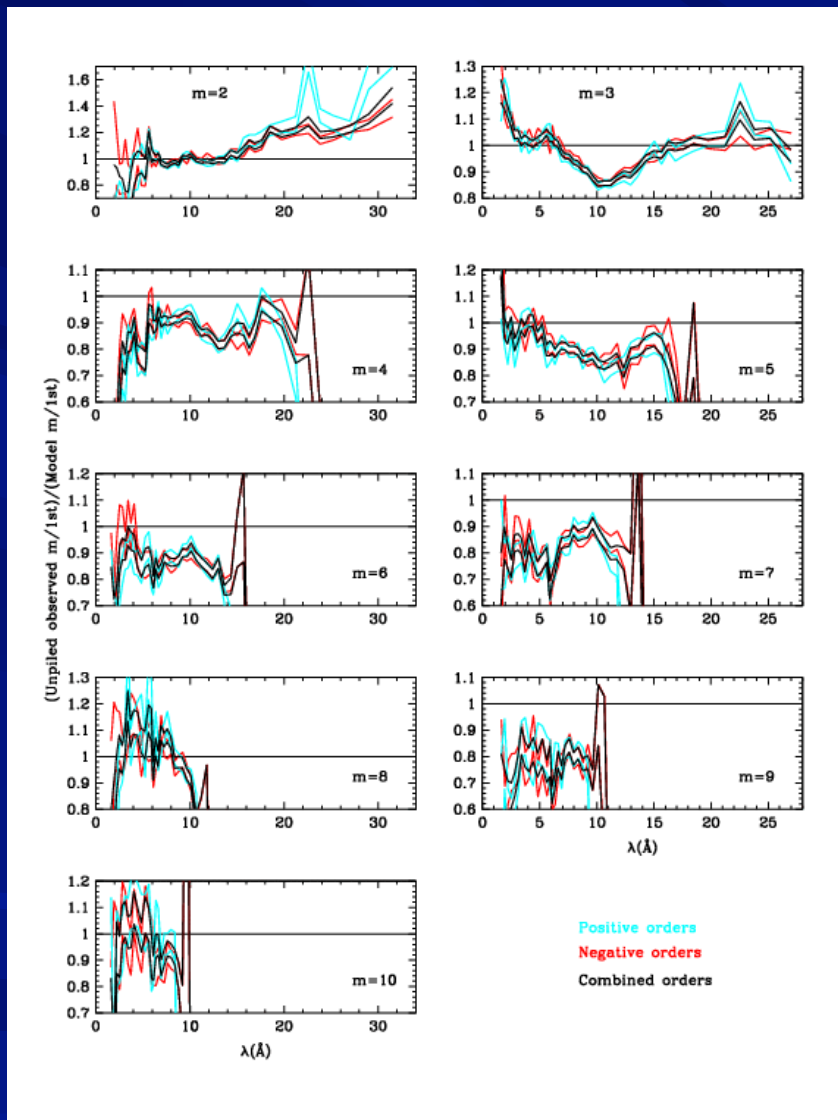

Updates to the LETG/ACIS-S Extraction Region

CALDB 4.1.1 contained an update to the LETG/ACIS-S source and background extraction regions and the fraction of total events within the source extraction region.

Updates to the LETG Higher Order Efficiencies

Internal Chandra Cross-Calibration

Calibration products derived from ground-based data.

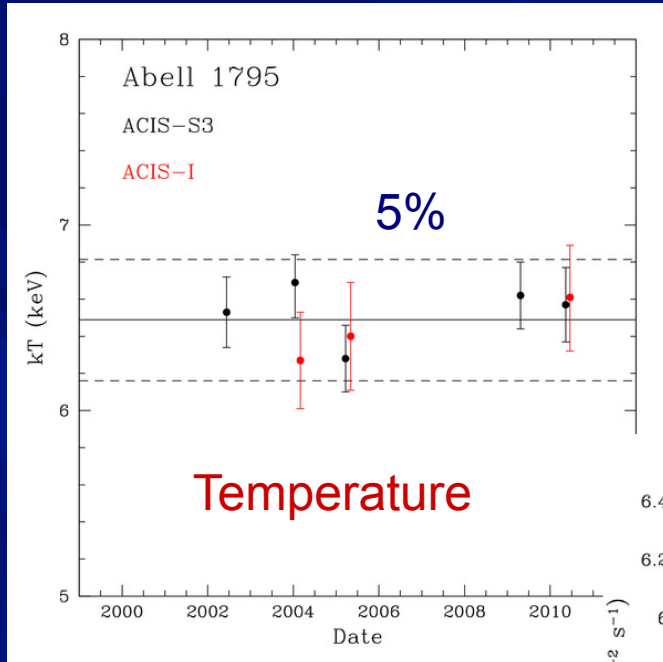

- HRMA effective area
- ACIS-S and ACIS-I QE
- LETG first order efficiency
- MEG first order efficiency for $E < 1$ keV
- HEG first order efficiency for $E > 1$ keV
- Shape of HRC QE

Calibration products derived in-flight data and internal cross-calibration

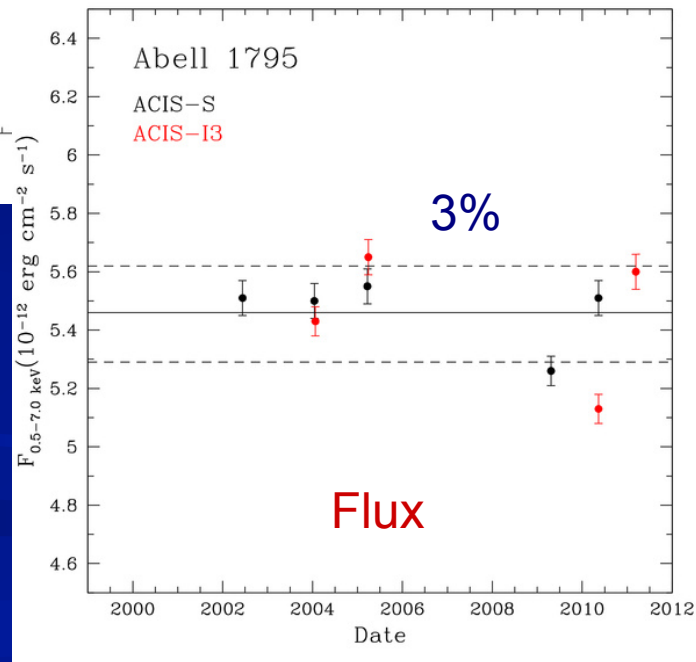

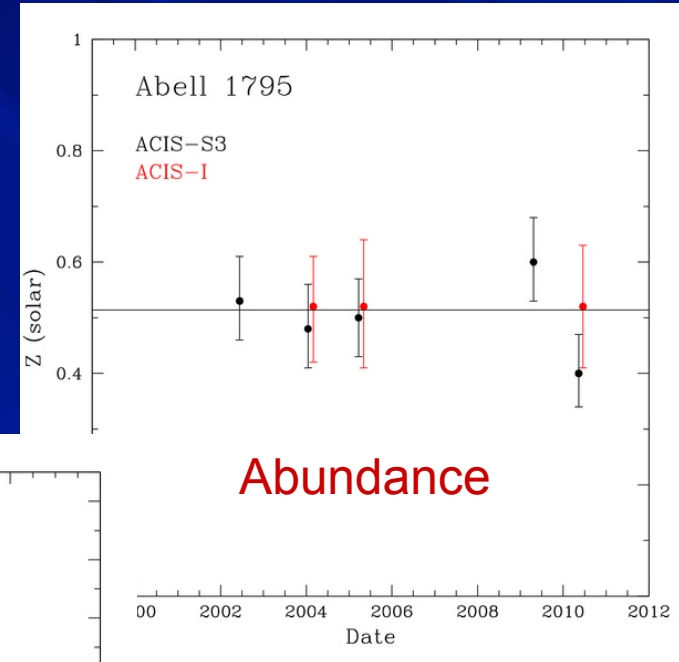

- HRC-I and HRC-S QE
- LETG higher order efficiencies
- ACIS contamination model
- MEG first order efficiency for $E > 1$ keV
- HEG first order efficiency for $E < 1$ keV

Internal Chandra Cross-Calibration

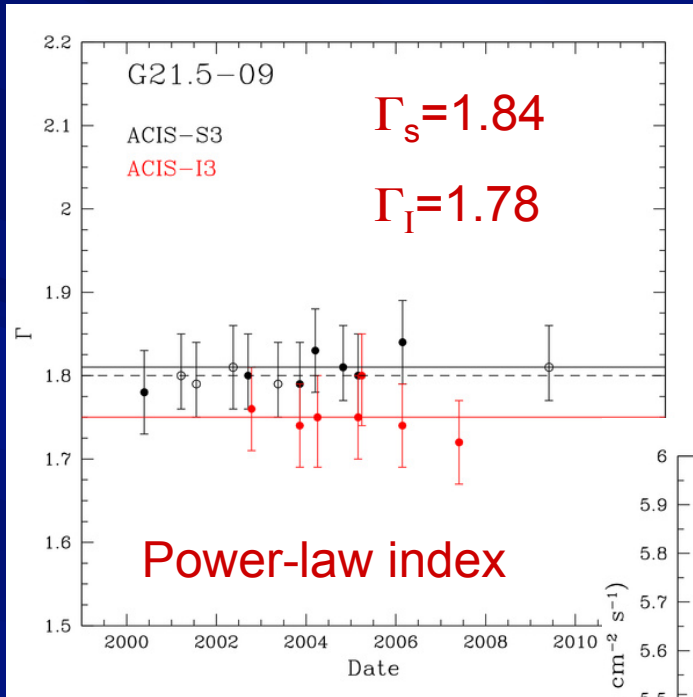

Bare ACIS-S/ACIS-I cross-calibration

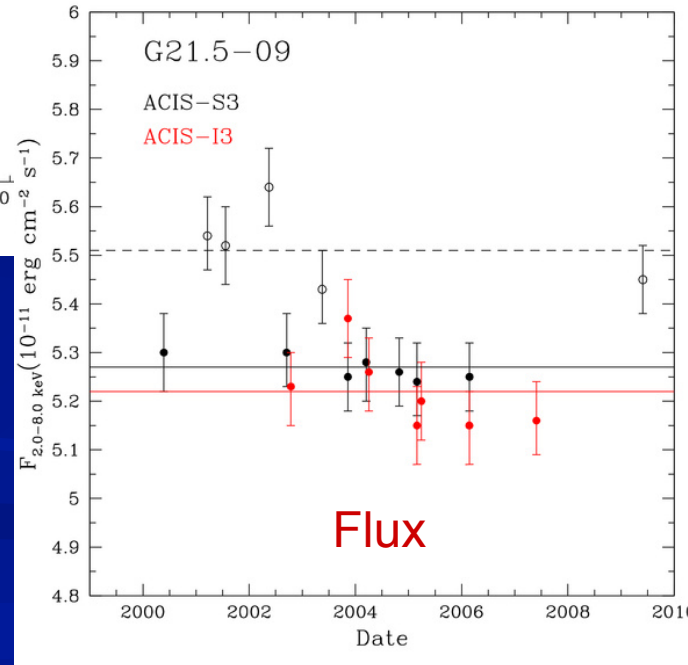

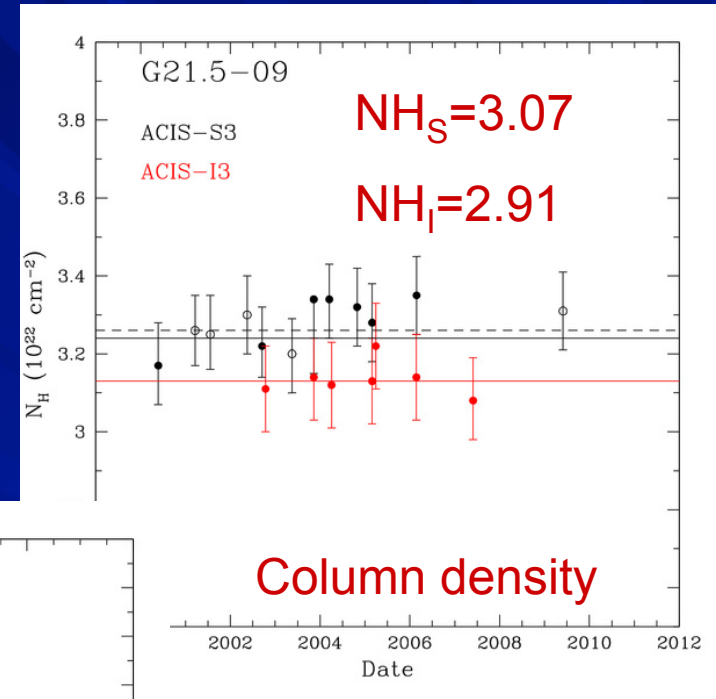

Abell 1795
phabs*apec

Bare ACIS-S/ACIS-I cross-calibration

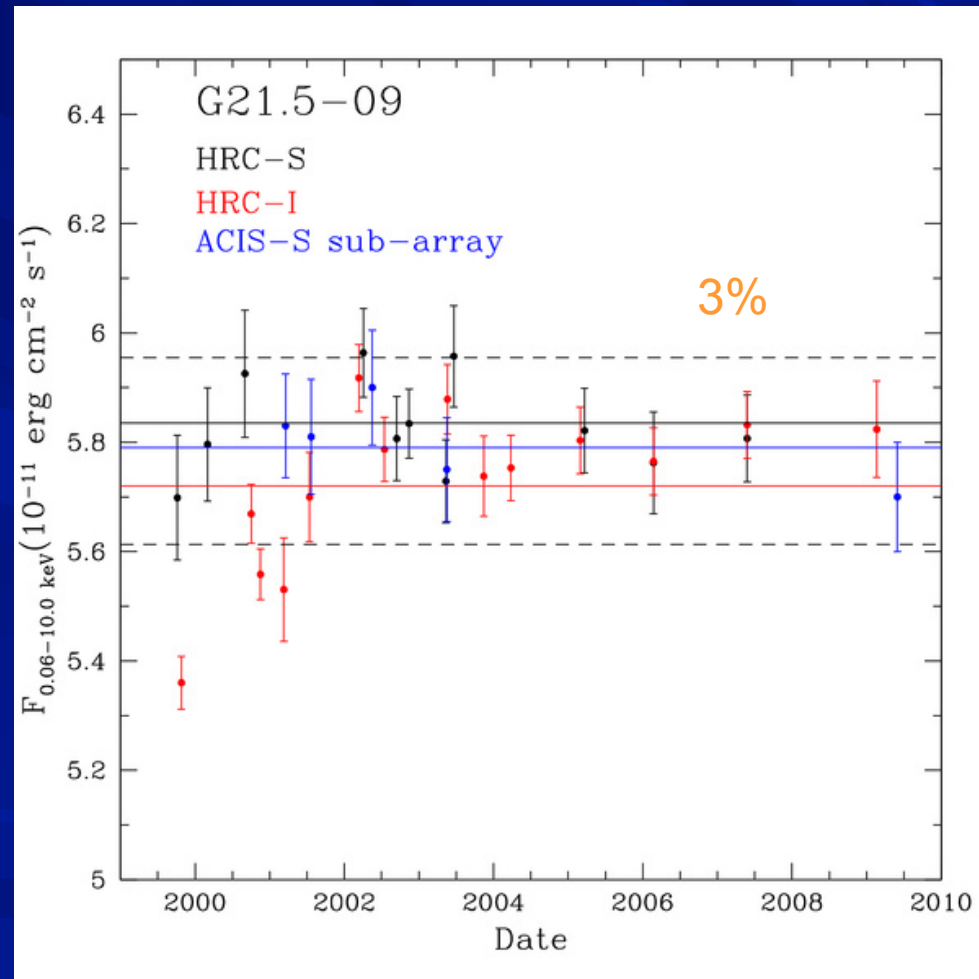

G21.5-09
phabs*pow

Filled symbols – full-frame
Open symbols – sub-array

Bare HRC-I/HRC-S/ACIS-S cross-calibration

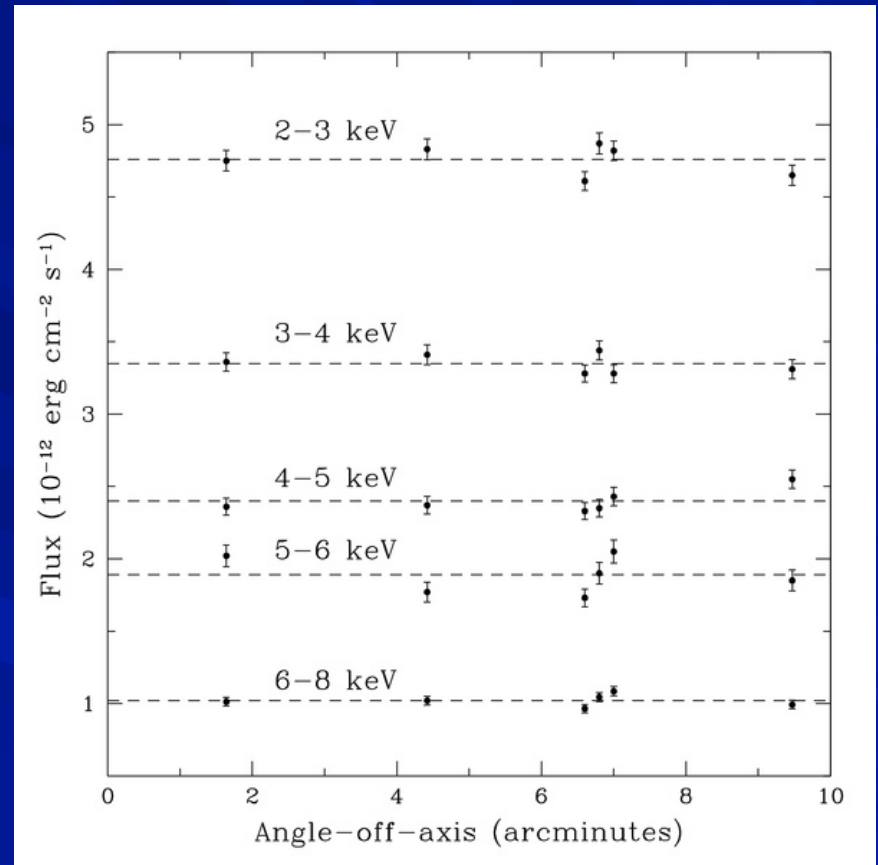

G21.5-09

Mirror Vignetting and ACIS QE MAP

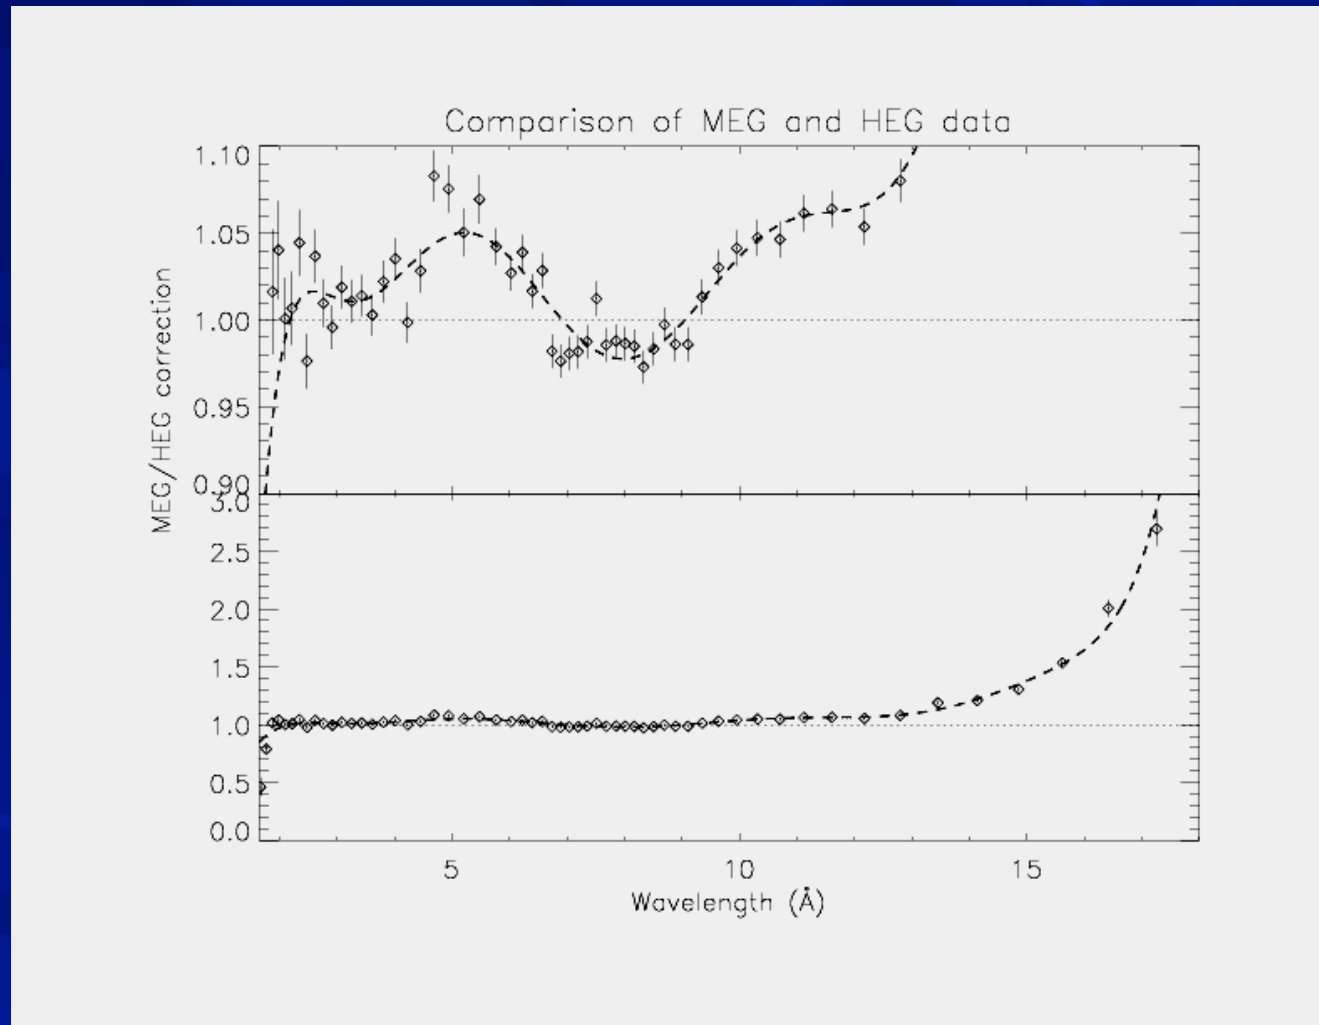

Abell 1795

ACIS-I3

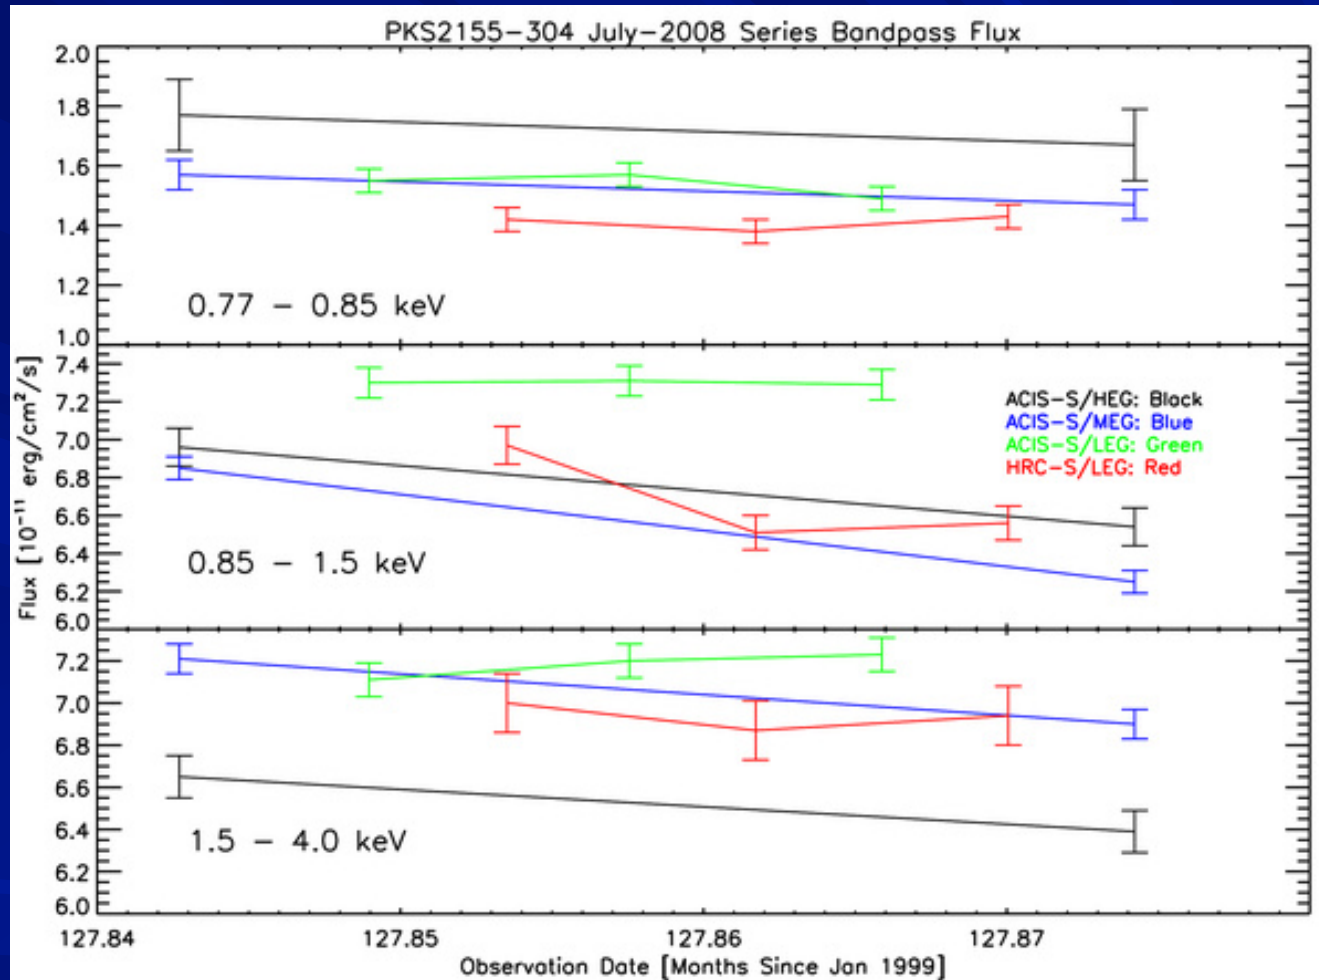

HEG/MEG Cross-Calibration

Sample of about 30 HETG/ACIS-S AGN observations

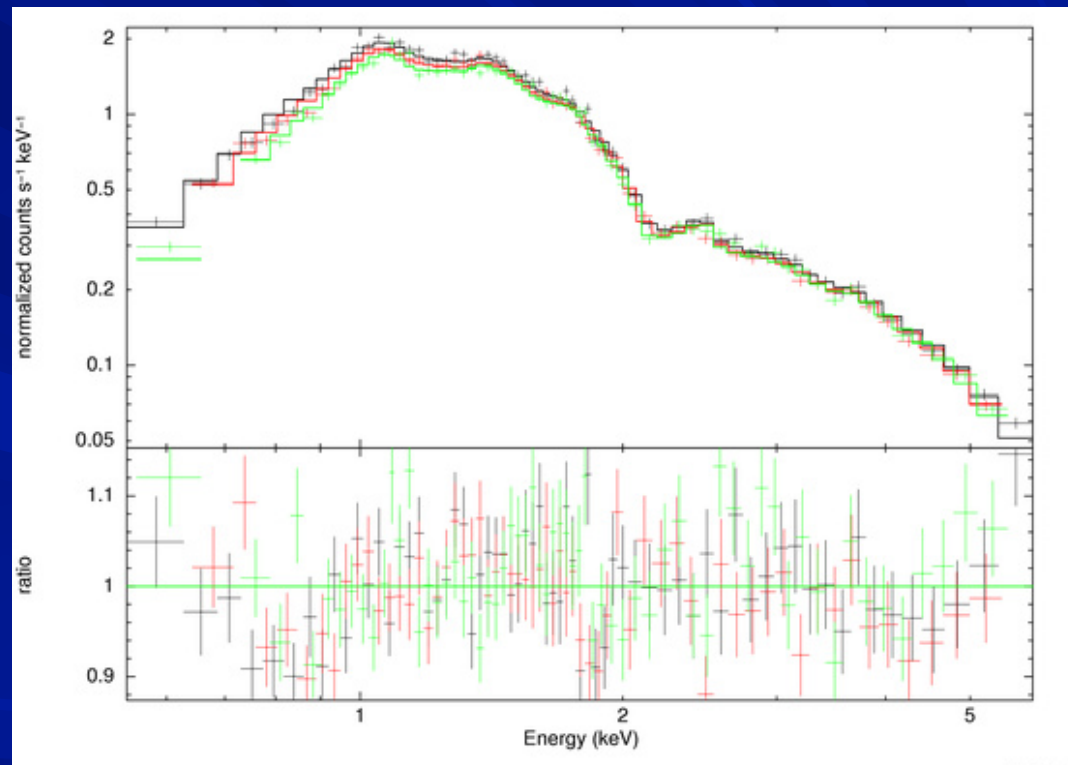

LEG/MEG/HEG Cross-Calibration

Current Calibration Issues

ACIS contamination model

ACIS-I3

Simultaneous two-temperature fit to 13108, 13112 and 13113

ACIS contamination model

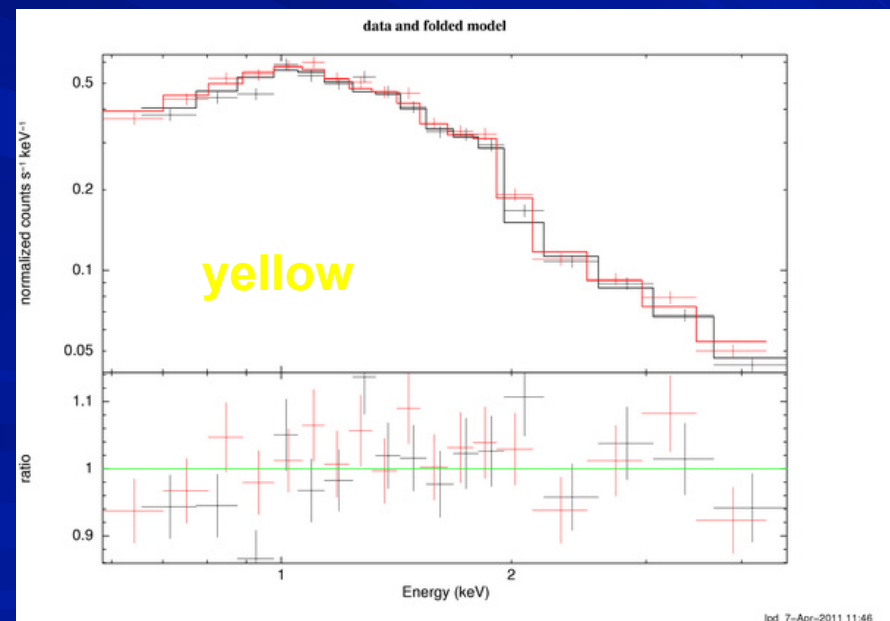

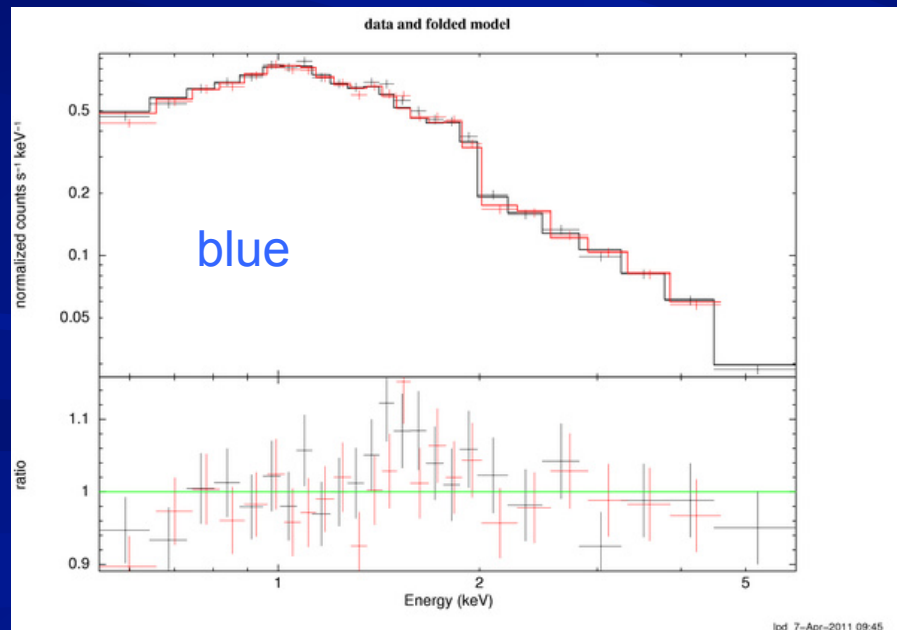

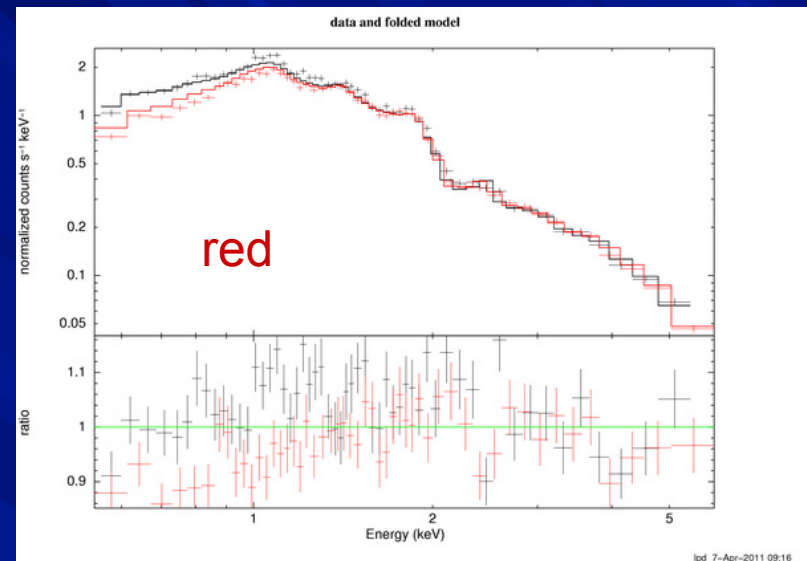

Simultaneous two-temperature fit to 13108 and 13111

13108 and 13109

ACIS contamination model

A1795 on S3

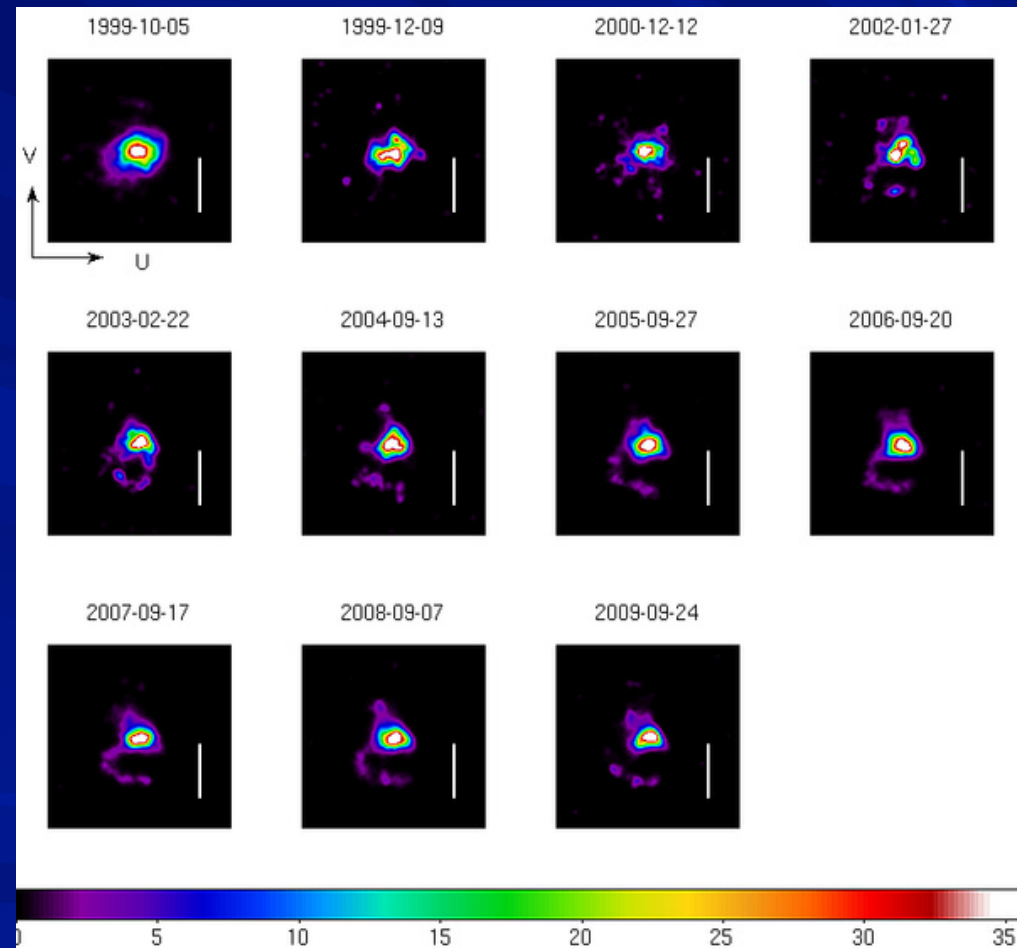

ACIS Detector

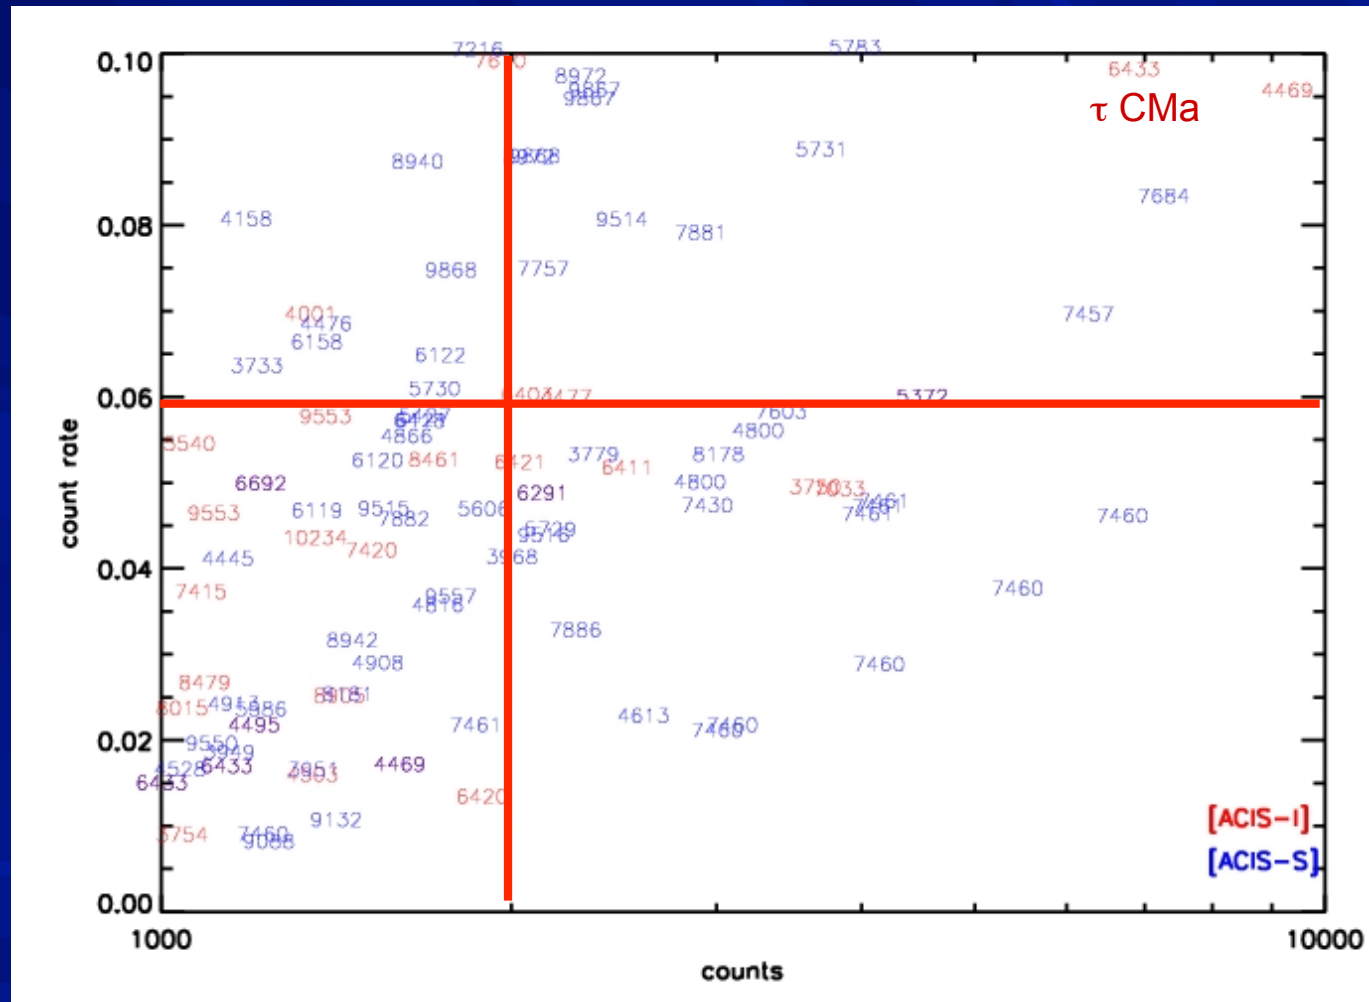

PSF Feature at 0.8" from image centroid

AR Lac HRC-I observations

Feature contains about 3% of the flux

PSF Feature

PSF Feature at 0.8" from image centroid

τ CMa

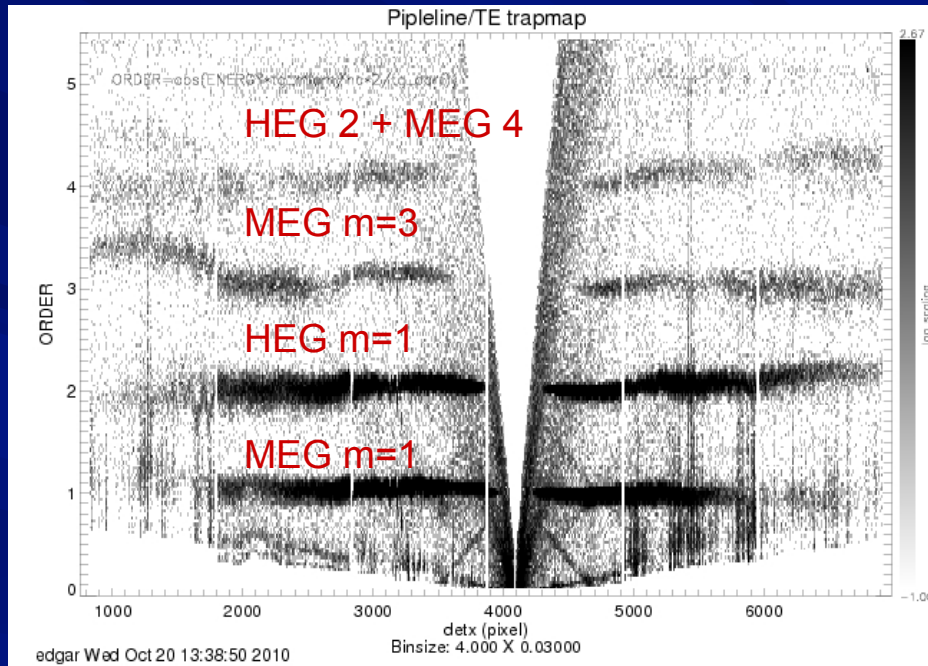

CC-F mode calibration

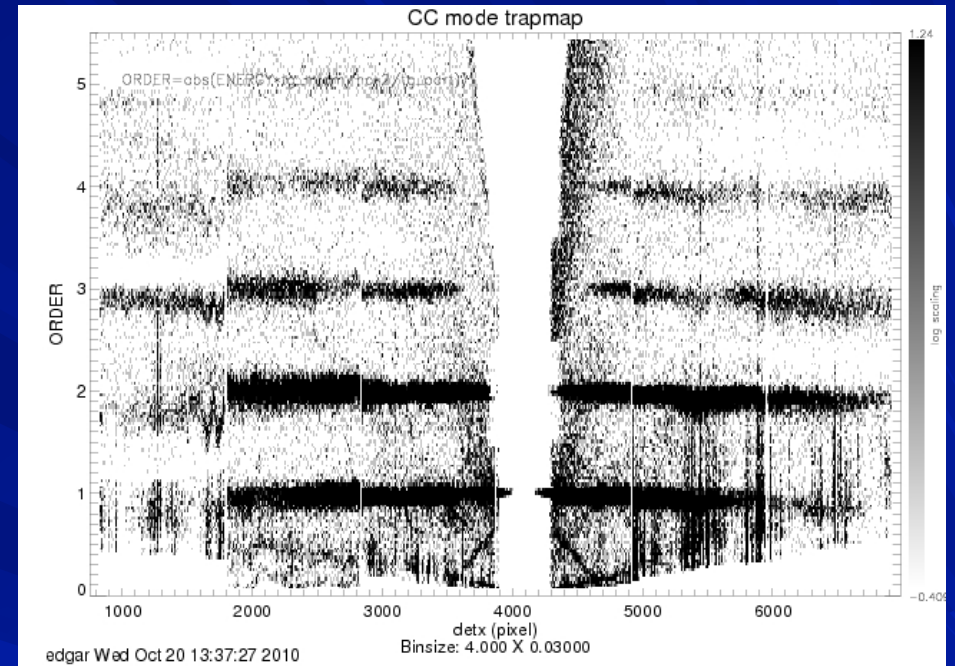

Required products for CC-F mode calibration

- Trap maps for CC mode data - done
- Gain tables for CC mode data – being worked
- QE tables for CC mode data
 - Prior to Dec. 2009 – being worked
 - After Dec. 2009 – should be similar to TE mode data
- RMF for CC-mode data - ?

CC-F mode calibration

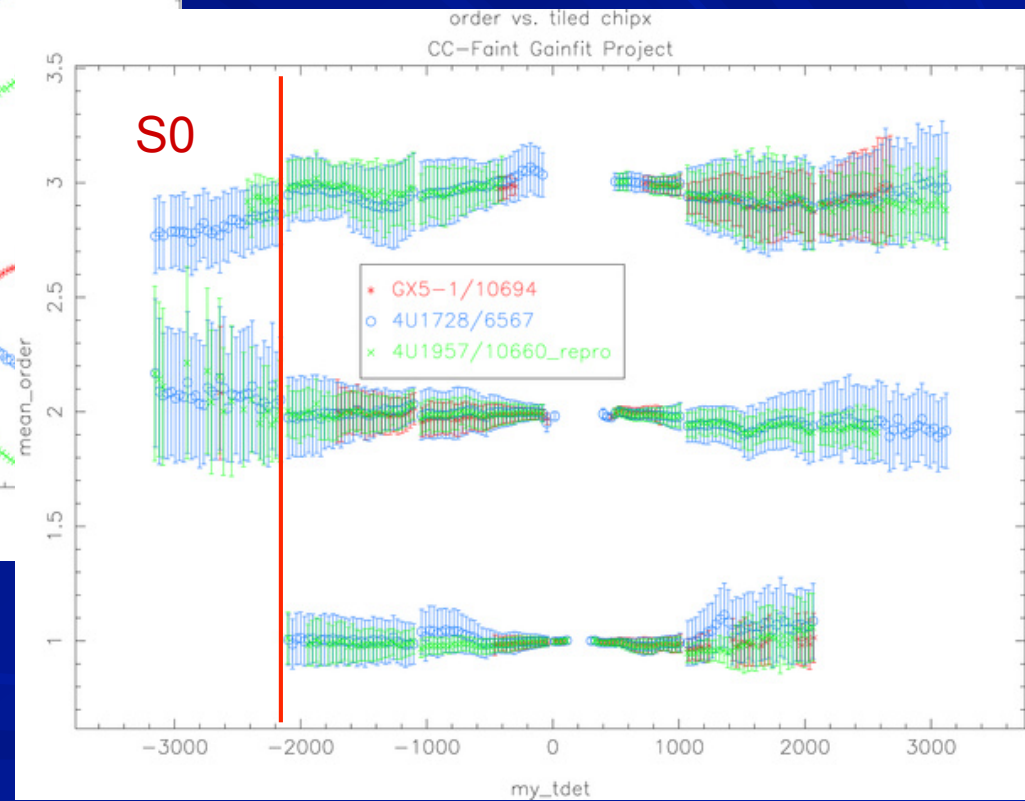

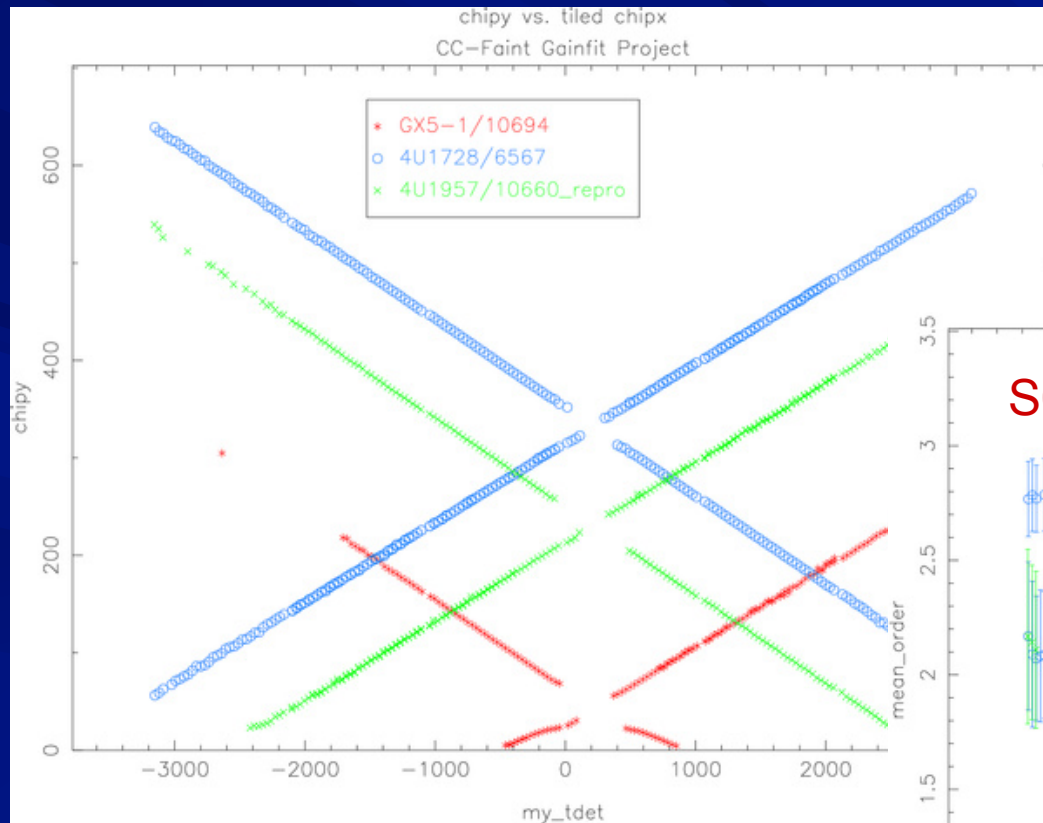

Present Default – TE mode trap map

CC-F mode trap map

Her X-1

CC-F mode gain calibration

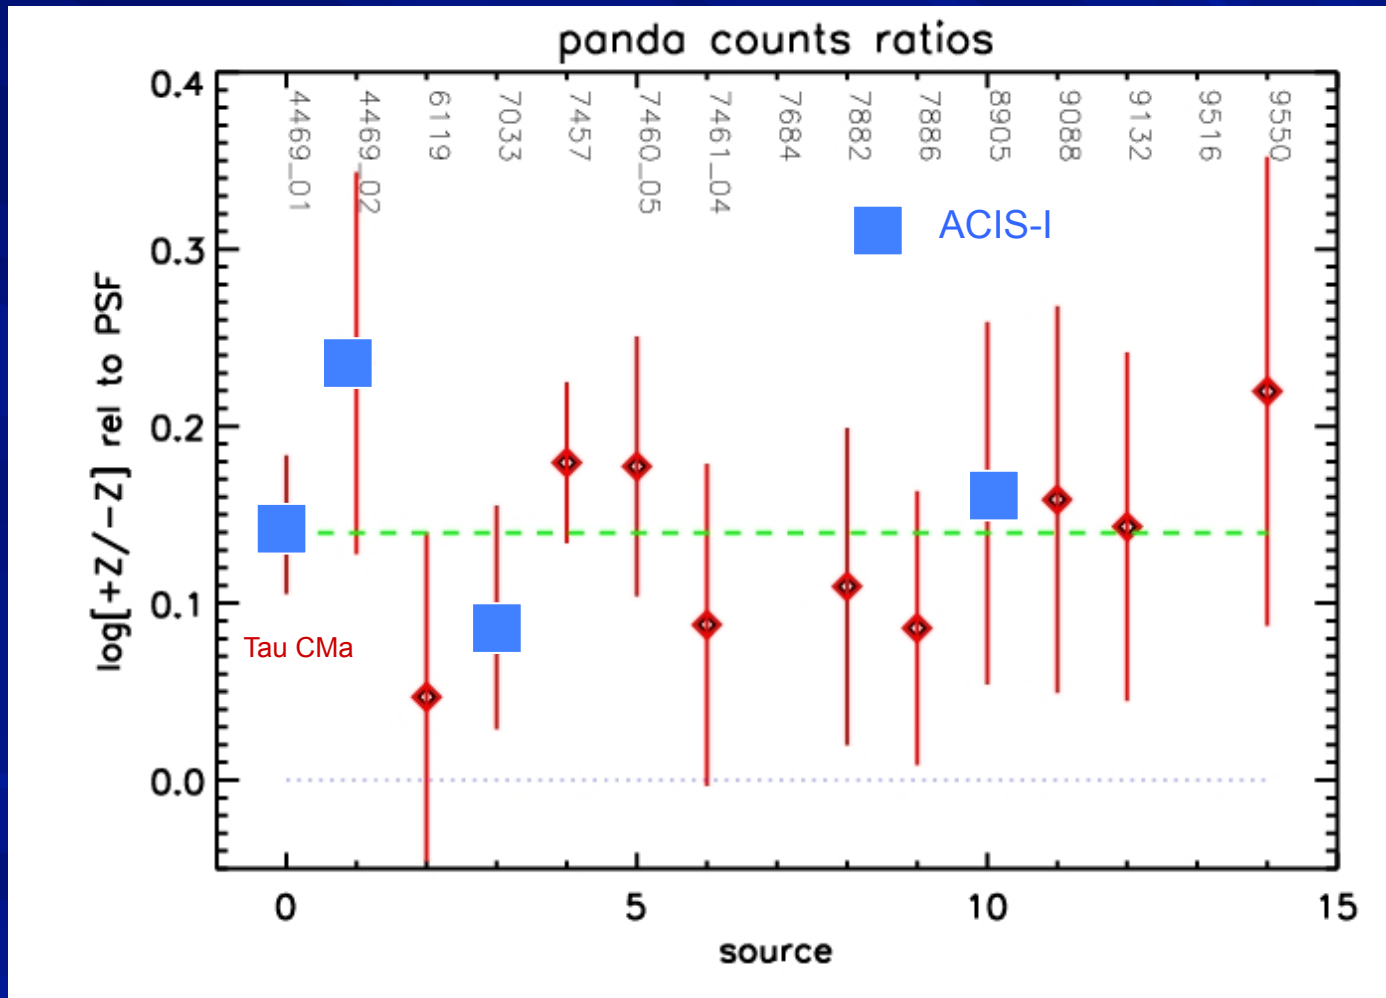

Summary of Present Calibration Activities

- CC- mode calibration
- Investigate PSF feature
- ACIS contamination model
- Adjustment to HRC-S QE below the C-K edge
- HETG higher order efficiencies

PSF Feature

Ratio of counts between 0.5-1.0" in + and - Z direction (i.e., parallel to the SIM)

Chandra Calibration Status

- Calibration updates since IACHEC 2010
- Internal Chandra cross-calibration status
- Current calibration issues and projects
